---	---------	----

PREFACE

Statistics in this publication include bulk steamer, ocean barge, ferry, and plane unloads of most agricultural products from sources outside the State and from the outlying islands, as well as marketings from the island of Oahu. Although direct imports made by the Armed Forces are excluded, quantities sold to commissary stores and sales to the Armed Forces by local dealers are included. Supplies of fresh fruits and vegetables from the State include quantities for fresh market as well as processing, and also outshipments from the State. Several items of minor importance are excluded and taro for poi manufacture is grouped with miscellaneous commodities. Marketings of poultry products include those from commercial producers with flocks of 100 or more birds; fluid milk production data are from farms with herds of 10 or more head; marketings of beef and swine products are from total slaughter figures. Unload data on meats do not include meats in any processed form.

Explanation of Data in Summary Tables

Fruits and vegetables of minor importance were omitted in Table 1; the quantities given include only those commodities listed in Table 1, page 9. Data generally have been rounded to thousands of pounds, except for eggs and livestock. Dressed poultry data are on an eviscerated basis for easier comparison of quantities received from the several sources. Oahu slaughter of hogs includes animals imported from the U. S. Mainland as well as unloads from the outer islands; and therefore, does not signify that all hogs slaughtered originated on Oahu farms. Cattle and sheep slaughter include animals raised on the neighbor islands.

In the index charts, the year 1950 has been selected as a base because it was least affected by factors that would tend to distort the normal flow of supplies.

ACKNOWLEDGEMENT

The Federal-State Market News work was made possible through the cooperation of the Agricultural Marketing Service, United States Department of Agriculture, and the Hawaii State Department of Agriculture. The Department of Agriculture gratefully acknowledges the assistance of all those who contributed information. Steamship, barge, and air transportation companies furnished the unload data; records of Oahu truck receipts were obtained from wholesalers.

5-YEAR SUMMARY OF HONOLULU MARKET SUPPLIES

Fresh and Frozen Fruits and Vegetables

In 1963, Honolulu market supplies of fresh fruits and vegetables totaled approximately 120.7 million pounds, an increase of 9.9 million pounds, or about 9 percent more than 1962. Supplies of state origin in 1963 represented only 40 percent of the total receipts or 48.4 million pounds.

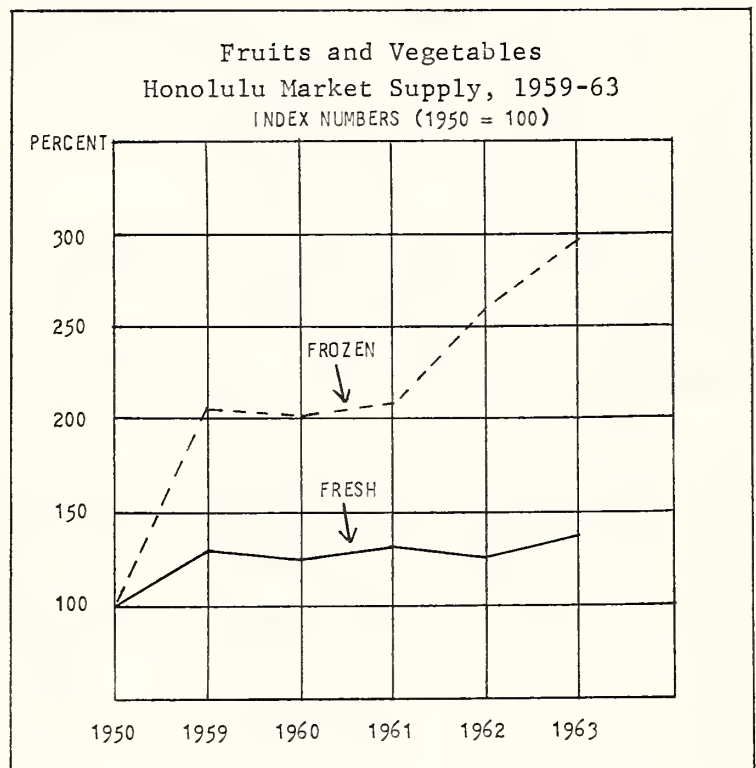

Climatically, the year 1963 was an exceptionally bad year for nearly all truck crops throughout the State of Hawaii as prolonged adverse weather conditions hampered production for the first five months. Farmers on Oahu suffered the most with a decrease in marketings of 4.4 million pounds, nearly 20 percent below 1962 output. However, a slight increase of 0.7 million pounds in Honolulu marketings was recorded by neighbor island farmers. State production dropped greatly in 1963, but importation from the U. S. Mainland increased 14.5 million pounds to meet the market requirements.

For the past 4-year period, there has been a continued upward movement of supplies from outer island farmers. They contributed 25 percent of the total supply in 1963, and Oahu farmers supplied only 15 percent.

Imports of frozen fruits and vegetables have increased rather consistently during the past five years. In 1963, imports increased 14 percent or 0.4 million pounds from 1962. All of the 3.6 million pounds of frozen fruit and vegetable products received on the market were from the U. S. Mainland.

Selected Dairy Products and Oleomargarine

The upward trend in the volume of fluid milk marketed in Honolulu was broken during 1963. Honolulu fresh milk marketings amounted to 106.2 million pounds, a decrease of 2.1 million pounds. However, 1963 marketings were 3.2 million pounds above the average for the period 1959-63.

Cheese imports showed a consistent upward trend during the past five years while butter and oleomargarine receipts fluctuated. In shipments of all three products in 1963 showed an increase over the 5-year average. Compared with 1962 imports, butter receipts gained 443,000 pounds, cheese receipts were up 106,000 pounds, but receipts of oleomargarine dropped 137,000 pounds.

Poultry Products

Eggs: Market receipts of fresh eggs from all sources in 1963 totaled nearly 399,200 cases, an increase of about 12,600 cases. Imports, all from the U. S. Mainland, decreased 16,100 cases or 30 percent compared with 1962.

State egg producers have increased their share of the total market supply to about 90 percent compared with about half or less for other agricultural enterprises in Hawaii. The state's poultry industry has reached this position in the Honolulu market, even though the competition from imported eggs was great.

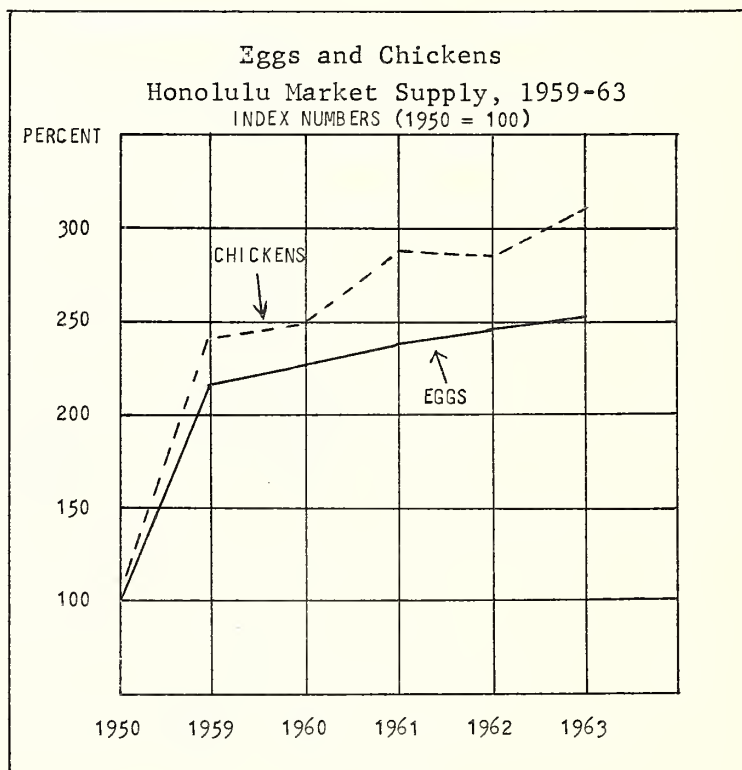

During the past 5-year period of 1959-63, both total supplies and state produced supplies showed a continuous upward trend. In 1963, Oahu poultrymen increased their marketings approximately 27,600 cases or 11 percent, and neighbor island farmers only 1,100 cases or 2 percent over 1962.

Poultry Meat: The total volume of poultry meat marketed in Honolulu last year was about 11.0 million pounds. Imports amounted to 6.6 million pounds which was 60 percent of the total supply.

Although there was a slight drop in 1962, the increase in the total supply of poultry meats between 1959 and 1963 was 31 percent. During the same period, poultry meat of state origin continued on a steady upward trend, showing a gain of 33 percent. The percentage increase in poultry meat imports was 30 percent.

Red Meats

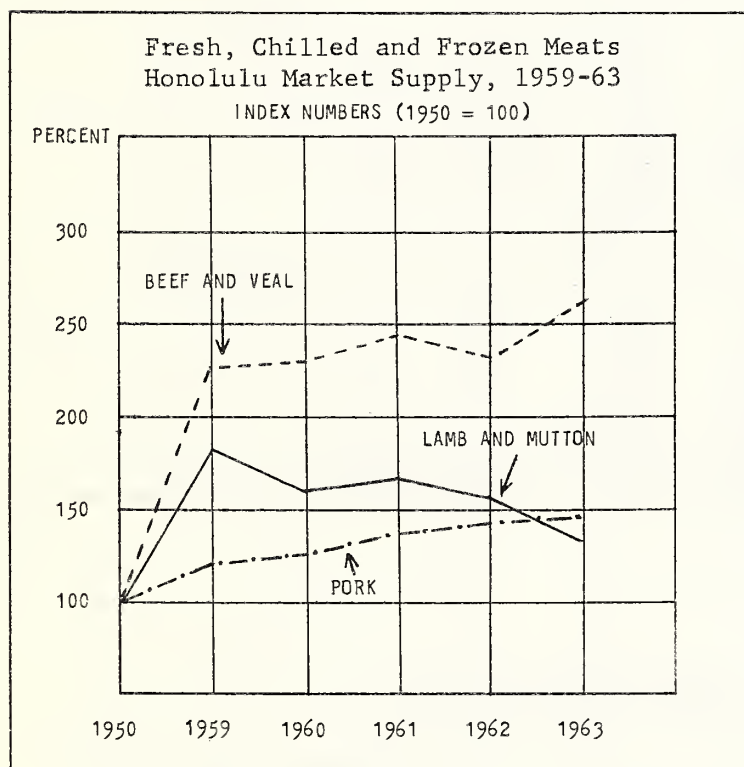

The Honolulu market supply of fresh, chilled, and frozen red meats amounted to 58.5 million pounds in 1963. This was an increase of 5.3 million pounds or 10 percent

above 1962. Beef and veal supplies were up 13 percent and pork supplies were up 4 percent, while lamb and mutton supplies decreased 17 percent.

There was no significant change from 1962 in the proportions of different red meats. Beef and veal constituted the largest volume of red meats with 70 percent; pork amounted to 28 percent; and lamb and mutton accounted for the remainder of 2 percent.

Beef and Veal: A total of 41.2 million pounds of beef and veal was marketed in Honolulu in 1963, 4.3 million pounds more than in 1962. All sources of supply shared in the increase. Beef and veal from the U. S. Mainland led with an increase of 2.3 million pounds over 1962 closely followed by New Zealand and Australian beef which totaled 2.0 million pounds more. Supplies from with-in state sources were up only 0.5 million pounds.

The state contribution to the market was 42 percent of the total; the U. S. Mainland supply, 30 percent; and foreign countries 28 percent.

Pork: Pork supplies in 1963 continued the upward trend of the preceding 4 years. The total receipts of fresh, chilled, and frozen pork in the Honolulu market in 1963 was approximately 16.4 million pounds, a gain of 0.7 million pounds.

Imports from foreign countries showed a decline of 400,000 pounds, and the state produced supply decreased 251,000 pounds. However, marketings of U. S. Mainland pork more than offset these decreases with a gain of 1.3 million pounds.

Lamb and Mutton: Lamb and mutton marketings have consistently been a small percentage of all the red meats and in 1963, decreased further. In 1963, a total of 957,000 pounds were marketed in Honolulu, which represents a decrease of 17 percent from 1962.
